description

This project is a challenge in creating a poster for an artist without using any images of the artist or of the artist's work. Chose an artist from the list provided* and create a poster that has a conceptual connection to that artist's work. The connection should go beyond trying to mimic the visual look of the work and consider mood, emotion, material, execution, etc. The only design restriction is that images of the artist's work, real or created, or images of the artist cannot be used in the design. There is a prompt on the back of this sheet to generate a list of words to help create a concept for the poster.

The poster should include following information — title of exhibition, name of artist, dates of exhibition (October 23, 2021 to February 5, 2022), exhibition venue (Geoson Contemporary Art Museum), location (Fairfax, VA), a few paragraphs about the artist or show (does not have to be original writing but should be relevant), your name, and fall 2021.

**It is possible to choose you own artist but it has to be approved.*

words, words, words

In the space below, right a list of words or phrases that describes the artist's work. These could describe a specific piece or describe a body of work but do not need to encompass all of the artist's work since you are deciding what this exhibition might hold. The words could relate to mood, emotion, material, execution, form, or anything else. You can also look at interviews and artist's statements to see how the artist describes their work.
